Allergen Analysis Report – April 25, 2025

Our menu is diverse and contains a wide variety of foods, many of which contain one of the nine major allergens: milk, egg, soy, wheat/gluten, sesame, peanuts, tree nuts, shellfish, and fish. While we have carefully reviewed our ingredients to inform our customers of foods that contain an allergen as part of the ingredient list, we cannot guarantee that cross-contact with other foods will not occur during preparation (i.e., use of common fryer), or that any menu item can be completely free of allergens. The health and safety of our guests is very important to us. Prior to placing your order, please alert the manager of any food allergies. Menu items are hand-prepared and may vary from the stated ingredients. Menu items marked as containing allergens indicate the presence of those allergens in recipe ingredients. Because of supply chain changes, manufacturer formulation changes, and the potential for cross contact in a common kitchen, items not marked with specific allergens are not guaranteed to not contain those allergens. This information is updated periodically to reflect our current product offerings.

Menu Name		Milk	Egg	Soy	Wheat / Gluten	Peanuts	Tree Nuts	Fish	Shell- fish	Sesame
